

## CEU 2020 AIA Course

# Smart Lighting Control For the Modern World

## Learning Unit 1 AIA LU

The Internet of Things is projected to become a \$3 to \$11 trillion market and we know lighting will play a role. Bluetooth and other wireless protocols have emerged and are beginning to be deployed in projects. This course will look at the reasons for deploying a wireless “smart” system, discuss tradeoffs between wired and wireless systems.

### Who Should Attend:

Architects, Interior Designers, Lighting Designers, Engineers, Design-Build Contractors, End-Users, Owners Representatives, Facilities Managers, Operations Managers
