

## **Extend the Boundaries – General & Perimeter Lighting**

This course will review the entire building envelope as it relates to today's lighting. Design elements will include aspects of general lighting, perimeter and accent lighting. A review of design techniques will include wall wash, wall grazer and integration of architectural lighting.

Discussion will provide insight to wayfinding, coherence & visual perception through appropriate lighting practice.

*Key topics addressed in the seminar:*

1. The historical foundation to today's architecture lighting
2. Defining the architectural boundaries through lighting
3. Methods that reveal spatial form
4. Lighting provides Coherence & Way Finding
5. Techniques for highlighting perimeter elements
