io Pendant takes a circular 2D design and extrudes the glass downwards to create a perfectly ribbed cylindrical form. The luminaire's components are discreetly hidden, making the glass the true hero of the product, allowing the light to subtly reflect and refract.

The io Pendant has been handcrafted to the highest quality, with no detail spared. The delicacy of the glass will add a real sense of luxury to any interior space.

The Halftone's subtle, etched pattern begins from the edge of the disc and increases with intensity, creating a vivid ring of light.

The transparency of the acrylic allows the wall to still be visible, both when the light is switched on and off. Designed in two sizes and depths, Halftone can be layered to produce more intense and striking illumination, that will add interest to the surrounding architecture.
